### **DETAILED ACTION**

In view of the Appeal Brief filed on 8/3/2010, PROSECUTION IS HEREBY REOPENED. A new ground of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

/KEVIN C. SIRMONS/

Supervisory Patent Examiner, Art Unit 3767.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 3 and 4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 3 recites the flat tip comprising a surface area of 100 square micrometers or less and claim 4 recites the flat tip comprising a surface area of 50 square micrometers or less. However, independent claim 1

Art Unit: 3767

recites the area as being between 20 square micrometers or more and 250 square micrometers or less.

Thus, the recitation in claims 3 and 4 of the area encompassing 50 (or 100) square micrometers ‘or less’ encompasses embodiments in which the area could be less than 20 square micrometers – which is not supported by claim 1.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-8 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Trimmer (WO 96/10630).

Trimmer discloses in Figures 1A and 2A and on page 4 (lines 3-15) and a device having substrate with at plurality of microneedles projecting therefrom, the microneedles having a truncated tapered shape, wherein the microneedle has a flat tip comprising a surface area of 50 square micrometers of less, a base comprising an area of 900 square micrometers or more, and a height to maximum base dimension ration of 3:1 or more (see pages 7-8, lines 20-11); the microneedles formed of one or more polymers (page 11, lines 15-26); and the microneedles being used to contact skin.

### ***Response to Arguments***

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.
